Safe Senior Program

Safe Senior Program

The Safe Senior Program provides Miami Township residents a safe and secure program that identifies, locates and assists seniors during an emergency.

Participation is *voluntary*. There is no cost to you unless you participate in the lock box option.

The program is designed for:

- Residents with Alzheimer's/ dementia
- Those 60 years of age and older, who suffer from a potentially incapacitating condition and are often home alone
- Juvenile or adult with a developmental condition

HOW IT WORKS:

You provide us with pertinent information by filling out a Safe Senior Program *File of Life* form that can be downloaded at www.miamitownship.com.

- Fill out as much information as you want our officers to access in case of emergency. The information you share is up to you.
- Supply us with a photo, personal information, emergency contacts, vehicle information, medical history, medications etc.
- Return your form to the Miami Township Police Department, 2660 Lyons Road, during business hours, M-F, 7:30 a.m. to 4 p.m.

LOCK BOX OPTION:

- We can provide a limited number of lock boxes to attach to a door that police and fire personnel can access should they need to enter your home during an emergency.
- You can also purchase a lock box and provide us with the lock information.
- We will provide you with a program sticker to place on a window or door to identify that you participate in the program.

YOUR INFORMATION IS SECURE:

Your security is of our utmost concern. The information you voluntarily provide is stored in a secure database accessible only by police dispatchers, police officers and police supervisors.

The Miami Valley Fire District will also have access to the program information.

Police officers and fire personnel will not enter a residence unless summoned to an emergency.

A backup hard copy of the *File of Life* is secured with dispatchers should a power outage and/or computer failure occur.
